SUBJECT INDEX

METALS & ALLOYS

VOLUME II—JANUARY 1931 TO DECEMBER 1931

Abrasion, resistance to.—Harry C. Wolfe, 60–61
Abrasives, choice of.—H. W. Wagner. 39–43
Earle E. Schumacher & W. C. Ellis 111
Age Hardening of copper–titanium alloys. Earle E. Schumacher & W. C. Ellis, 111
Alloy Steel, oxyacetylene welding of.—J. H. Critchett. 253–256
——, production and heat treatment of.—R. A. Bull. 101–105
Alloys—aluminum, coatings for.—W. H. Mutchler. 324–330
——aluminum, new.—T. W. Bossert & J. A. Nock, Jr. 238–239
——Bismuth.—(ext. abs. H. W. Gillett.) 92–94
——copper, electrical resistivity of in molten state.—C. S. Williams. 240–241
——copper-titanium, age hardening of.—Earle E. Schumacher & W. C. Ellis. 111
——strontium-cadmium, preparation and physical properties of.—Harold C. Hodge, et al. 355–357
Aluminum alloys.—W. H. Mutchler. 324–330
——alloys new.—T. W. Bossert & J. A. Nock, Jr. 238–239
——Brass, nickel in.—(cond. H. W. Gillett.) 366
——ingots, avoiding defects in.—G. L. Craig. 192–196
——orientation produced by cold rolling in surface of sheets of.—Cleveland B. Hollabaugh & Wheeler P. Davey. 246–250, 302–312
Annealing, effect of temperature on cold worked low carbon steel.—H. E. Publow. 18–19

Bearing Metal.—Ernest B. Drake. 20–24
Bismuth alloys.—(ext. abs. H. W. Gillett.) 92–94
——, use of in metal forming.—Walter C. Smith. 236–237
Brass aluminum, nickel in.—(cond. H. W. Gillett.) 366
Brasses, influence of impurities in foundry.—H. M. St. John. 242–245
Brazing, copper in controlled atmosphere furnaces.—H. M. Webber. 284–287
Bronze, leaded, oxidation a cause of porosity.—E. Doughty. 181–183
Bronzes, influence of impurities in foundry.—H. M. St. John. 242–245
Bureau of Standards.—Richard Rimbach. 65–70

Cadmium—strontium alloys, preparation and physical properties of.—Harold C. Hodge, et al. 355–357
Carburizing, mechanism of energizer action in.—R. A. Ragatz & O. L. Kowalke. 343–348
——with oil.—A. J. Lindberg. 106–109
——steel.—R. A. Ragatz & O. L. Kowalke. 290–296
Cast Iron, heat treatment of.—F. B. Coyle. 120–131
——structure of.—F. B. Coyle. 120–131
——, molybdenum, mechanical & creep properties of.—C. H. Lorig & F. B. Dahle. 229–235
——, effect of molybdenum in graphitization.—W. H. Jennings, Jr. & E. L. Henderson. 223–225
Cast wrought materials, endurance of welded and unwelded.—(crit. abs. H. W. Gillett.) 313–314
Casting, centrifugal of metals & alloys.—J. E. Hurst. 197–205
——of metals.—Richard Rimbach. 65–70
——, Vacuum.—H. T. Reeve. 184–185
Cathodic Protection.—U. R. Evans. 62–64
Centrifugal Casting metals and Alloys.—J. E. Hurst. 197–205
Chromium Plate, testing for resistance.—Harry C. Wolfe. 60–61
——plating.—W. Blum. (ext. / abs. H. W. Gillett.) 365
Coatings, adhesion of electroplated.—W. Blum. 57–59

Cold Rolling, orientation produced by.—Cleveland B. Hollabaugh & Wheeler P. Davey. 246–250; 302–312
Copper alloys, electrical resistivity of in molten state.—C. S. Williams. 240–241
——brazing in controlled atmosphere furnaces.—H. M. Webber. 284–287
——orientation produced by cold rolling in surface of sheets of.—Cleveland B. Hollabaugh & Wheeler P. Davey. 246–250; 302–312
——Titanium Alloys, age hardening of.—Earle E. Schumacher & W. C. Ellis. 111
Corrosion, resistance of metals.—Richard Rimbach. 65–70
Creep, and mechanical properties of molybdenum cast iron.—C. H. Lorig & F. B. Dahle. 229–235
——testing apparatus.—B. A. Roberts & R. L. Dowdell. 349–351
Current Density.—U. R. Evans. 62–64

Decarburization, surface, effect on fatigue properties of steel.—C. R. Austin. 117–119
Deep Drawing, testing in sheet metal. H. W. Gillett. 214–222
Die Casting, zinc, plating a.—E. A. Anderson & E. J. Wilhelm. 337–340
Duraluminum, keeping rivets workable with dry ice.—E. P. Dean. 165

Economics of tungsten.—Paul M. Tyler. 80–83
Effects of heat upon cast iron.—F. B. Coyle. 120–131
——of impurities on foundry brasses & bronzes.—H. M. St. John. 242–245
——of molybdenum on graphitization in cast iron.—W. H. Jennings, Jr. & E. L. Henderson. 223–225
——of transverse holes on fatigue resistance.—(ext. abs. H. W. Gillett.) 94–95
——of various annealing temperatures on cold worked low carbon steel.—H. E. Publow. 18–19
Endurance of welded & unwelded cast wrought materials.—(crit. abs. H. W. Gillett.) 313–314
Etching.—H. B. Pulsifer. 84–88
——macro, of tin-base bearing metals.—Ernest B. Drake. 20–24
Eutectic, lead-zinc.—J. M. Hodge & R. H. Heyer. 297–301

Fatigue.—H. W. Gillett. 71–79
——effect of surface decarburization on in steel.—C. R. Austin. 117–119
——resistance.—(ext. abs. H. W. Gillett.) 94–95
Foil, applications.—R. P. Stranahan. 206–208
Forging, heating for.—Robert M. Keeney. 3–8
Friction and wear tests.—(ext. abs. H. W. Gillett.) 95–96
Furnaces, continuous strip annealing.—O. Junker. 352–354
——for Metallographic Examination.—B. A. Rogers. 8–12
——modern.—Richard Rimbach. 158–164

Gears, forging of.—Robert M. Keeney. 3–8
Grinding of metals and of refractories.—H. W. Wagner. 39–43

Heat Transfer, in continuous strip annealing furnaces.—O. Junker. 352–354
Heat Treatment of alloy steels.—R. A. Bull 101–105
——fundamentals of.—F. B. Coyle. 120–131
Hydrogen, atomic arc welding.—J. T. Catlett. 272–276

Iron, alloys, oxyacetylene welding of alloy steels and irons.—J. H. Critchett. 253–256
——heat treatment of.—F. B. Coyle. 120–131

Japanning of steel.—William J. Miskella. 318–323

Laboratories, Midvale Research.—Richard Rimbach. 288–289
——Trubia Fabrica Nacional.—A. G. Soto. 358–359
Lacquers, metal evaluation of.—G. C. Shakour & L. W. Munchmeyer. 331–336
Lead-Zinc eutectic.—J. M. Hodge & R. H. Heyer. 297–301

Machining.—T. G. Digges. 44–50
Malleable Iron, progress of.—H. A. Schwartz. 143–149
Melting of metals.—Richard Rimbach. 65–70
Metallography.—B. A. Rogers. 9–12
——solves mystery of shot gun explosion.—Oscar E. Harder. 226–228
——structural.—H. B. Pulsifer. 84–88
Metallurgy, thermal and chemical.—Richard Rimbach. 65–70
Molybdenum cast iron, mechanical and creep properties of.—C. H. Lorig & F. B. Dahle. 229–235
——effects of, on graphitization of white cast iron. 223–225

New Jersey Zinc Company.—Richard Rimbach. 13–17
Nickel in Aluminium Brass. (cond. H. W. Gillett.) 366
——orientation produced by cold rolling in surface of sheets of.—Cleveland B. Hollabaugh & Wheeler P. Davey. 246–250; 302–312
——story of the industry.—A. J. Wadhams. 166–175
Nitralloy, position of in industry.—M. A. Grossmann. 150–154
Nitriding, for the engineer.—Oscar E. Harder. 132–142
Nitrocellulose, clear metal lacquers.—G. C. Shakour & L. W. Munchmeyer. 331–336

Oil as a carburizing medium.—A. J. Lindberg. 106–109
——as a heat source for forging.—Robert M. Keeney. 3–8
Oxidation, a cause of porosity in leaded bronze.—E. Doughty. 181–183

Pearlite, microstructure of.—H. E. Publow & C. Heath. 155–157
Photomicrographs.—B. A. Rogers. 9–12
Plate, steel, securing quality in.—J. Stewart Huston. 209–213
Plating, chromium.—(ext. abs. H. W. Gillett.) 365
——on zinc die castings.—E. A. Anderson & E. J. Wilhelm. 337–340
Polishing machine.—W. F. Davidson. 89–91
Porosity oxidation—a cause of in loaded bronze.—E. Doughty. 181–183
Pouring practice for avoidance of defects in aluminum ingots for rolling.—G. L. Craig. 192–196
Properties, fatigue of steel.—C. R. Austin. 117–119
——mechanical and creep molybdenum cast iron.—C. H. Lorig & F. B. Dahle. 229–235
——of common steels.—R. A. Bull. 101–105
——of heat treated nitriding steels.—Oscar E. Harder. 132–142
——of stainless steels.—(crit. abs. V. V. Kendall.) 31–33
——of strontium-cadmium alloys.—Harold C. Hodge, et al. 355–357
——of wrought iron.—H. W. Gillett. 25–30
Protective coatings.—W. Blum. 57–59 also W. H. Mutchler. 324–330
——zinc, adherence of.—William H. Finkeldey 266–271

Refractories, grinding of.—H. W. Wagner. 39–43
Research, coöperative.—H. W. Gillett. 360–364
——need for, on wrought iron.—H. W. Gillett. 25–30
——the Midvale Laboratory.—Richard Rimbach. 288–289
Resistivity, electrical of copper alloys in molten steel.—C. S. Williams. 240–241

Sheets, steel, automatic arc welding.—A. M. Candy. 262–265
Sherardizing.—Fred L. Wolf. 341–342
Silver, orientation produced by cold rolling in surface of sheets of.—Cleveland B. Hollabaugh & Wheeler P. Davey. 246–250; 302–312
——solder, uses of.—R. H. Leach. 278–283
Solder, silver, uses of.—R. H. Leach. 278–283
—soft, application of.—G. O. Hiers. 257–261
Specifications of A.S.T.M.—R. A. Bull. 101–105
Stainless Steels.—(crit. abs.)—V. V. Kendall. 31–33
Steel, carburizing.—R. A. Ragatz & O. L Kowalke. 290–296
——determining cleanness of.—Samuel Epstein. 186–191
——properties of.—C. R. Austin. 117–119
Strip, annealing continuous of.—O. Junker. 352–354
Strontium-cadmium alloys, preparation and physical properties of.—Harold C. Hodge. 355–357
Structure of metals.—Richard Rimbach. 65–70
Surfacing.—H. B. Pulsifer. 84–88

Temperature, nitriding.—Oscar E. Harder. 132–142

Testing, creep.—D. A. Roberts & R. L. Dowdell. 349–351
——deep drawing qualities in sheet metal.—H. W. Gillett. 214–222
——fatigue.—H. W. Gillett. 71–79
——wear.—Samuel J. Rosenberg & Harry K. Herschman. 52–56
Tin-Base bearing metals.—Ernest B. Drake. 20–24
Titanium-Copper Alloys, age hardening of.—Earle E. Schumacher & W. C. Ellis. 111
Tools, life of.—T. G. Digges. 44–50
——testing of.—T. G. Digges. 44–50
Tool Steel, failures of.—W. H. Wills. 112–116
Transformations in metals and alloys.—B. A. Rogers. 9–12
sten, economics of.—Paul M. Tyler. 80–83
es.—Paul M. Tyler. 80–83
Use of tungsten.—Paul M. Tyler. 80–83
Wear, friction, tests.—(ext. abs. H. W. Gillett.) 95–96
——of metals.—Samuel J. Rosenberg & Harry K. Herschman. 52–56
Welding, atomic hydrogen arc.—J. T. Catlett. 272–276
——automatic arc of steel sheets.—A. M. Candy. 262–265
——oxy-acetylene of alloy steels and irons.—J. H. Critchett. 253–256
Working, mechanical, of metals.—Richard Rimbach. 65–70
——surface.—(ext. abs. H. W. Gillett.) 94–95
Wrought, cast materials, endurance of welded and unwelded.—(crit. abs. H. W. Gillett.) 313–314
——Iron.—H. W. Gillett. 25–30
Zinc, adherence of coatings.—William H. Finkeldey. 266–271
——die castings, plating on.—E. A. Anderson & E. J. Wilhelm. 337–340
——lead eutectic.—J. M. Hodge & R. H. Heyer. 297–301
——polymorphism of.—L. Anastasiadis & W. Guertler. 354

AUTHOR INDEX

METALS & ALLOYS

VOLUME II—JANUARY 1931 TO DECEMBER 1931

Anderson, E. A. & Wilhelm, E. J.—Plating on Zinc Die Castings. 337
Austin, C. R.—Effect of Surface Decarburization on Fatigue Properties of Steel. 117

Bartels, W. B.—Endurance of Welded and Unwelded Cast Wrought Materials. (crit. abs. by H. W. Gillett.) 313
Blum, W.—Adhesion of Electroplated Coatings. 57
——The Status of Chromium Plating. (ext. abs. by H. W. Gillett.) 365
Bossert, T. W. & Nock, J. A., Jr.—A New Aluminum Alloy. 238
Bull, R. A.—Production and Heat Treatment of Alloy Steels. 101

Candy, A. M.—Automatic Arc Welding of Steel Sheets. 262
Catlett, J. T.—Atomic Hydrogen Arc Welding. 272
Coyle, F. B.—Heat Treatment Fundamentals of Plain and Alloy Cast Iron. 120
Craig, G. L.—Pouring Practice for Avoidance of Defects in Aluminum Ingots for Rolling. 192
Critchett, J. H.—Oxy-Acetylene Welding of Alloy Steels and Irons. 253

Dahle, F. B. & Lorig, C. H.—Mechanical and Creep Properties of Molybdenum Cast Iron. 229
Davey, Wheeler P. & Hollabaugh, Cleveland B.—Preferred Orientation Produced by Cold Rolling in the Surface of Sheets of Aluminum, Nickel, Copper and Silver. 246, 302
Davidson, W. F.—An Automatic Metallographic Polishing Machine. 89
Dean, E. P.—Keeping Duralumin Rivets Workable with Dry Ice. 165
